

## Zadanie 10

Zbadaj działanie dolnoprzepustowych filtrów uśredniającego i gaussowskiego dla danych obrazów. Zaobserwuj wpływ rozmiaru masek na wynik filtracji.

```
In [7]: import matplotlib.pyplot as plt
import cv2
import skimage.filters as flt
import skimage.morphology as morph
from skimage.filters import rank
from skimage.color import rgb2gray
from skimage.util import img_as_ubyte
```

```
In [8]: # Załadowanie pliku .tiff
img_a = cv2.imread("src/characters_test_pattern.tif")
img_b = cv2.imread("src/zoneplate.tif")
```

```
In [9]: plt.figure(figsize=(25,7))
